Your Next Move

Like many, you may be thinking about the next step, the next challenge in your education or career. Undergraduate and Postgraduate degrees, internships, full-time employment or new horizons might be on your radar, if that's the case...

...then this year's KSU Careers Expo is a good opportunity to get ahead! You can meet up with various businesses, Faculties and student organisations who are all ready to provide information, career paths and advice. You will also have the chance to leave your CV and get that key first interview with some of Malta's top companies right there and then.

In your free hours join KSU at the University Quadrangle on the 26, 27 and 28 February by filling the form <https://goo.gl/forms/TXXnFYDgzcOUBjHD3>

For more information visit our Facebook page or send an email to education@ksu.org.mt

Biodiversity Corner

Il-Berwieq perennial plant typically growing in the garigue was introduced on College Campus four years ago. Anyone walking in the countryside right now will notice the conspicuous long stalks with white/ pinkish flowers covering the garigue. It survives the harsh summer season as dormant roots underground (hence referred to as a geophyte). Noticable in summer would be the dry asphodel stalks which are often covered with white (dormant) snails escaping the extremely hot soil surfaces.

Being Calypso - Being Ulysses Workshop

The workshops focus on OUTLAND, the film installation by Vince Briffa for the 58th edition of the Venice Art Biennale and its relevance to teenage manifestation of obsessive love and desire as a starting point for discussion. The workshops will follow an introspective methodology as a process of art-making bridging visual arts with the woven word.

Young artists and Maltese Language Students are encouraged to express their interest in this project and book a place for the first meeting by emailing secretary.jc@um.edu.mt

First Meeting on 27 February, 14:00 to 17:00 hrs
Art Room Db19 - Junior College

Stargazer Astronomy Group

A group of Stargazer Astronomy Group students visited the labs of the Institute for Space Science and Astronomy (ISSA) at the University, where they were welcomed by Dr Jackson Said, and toured around by Mr Josef Borg. The students, some of whom are doing their SOK project with the ISSA, could appreciate the wide range of practical and theoretical work being carried out at the Institute, and asked about future possibilities for their studies. More activities are being planned for the near future.

A negative mind will never give you a positive life.
